SUMMARY

Software Engineer with hands-on experience building scalable and production-ready web applications using React.js, Node.js, Express.js, MongoDB, Java, and Python. Skilled in REST API integration, backend development, database management, and building end-to-end full stack solutions with a focus on performance, scalability, and clean architecture.

WORK EXPERIENCE

Concentrix Daksh Limited

Jan 2023 - Jan 2025

Full Stack Developer

Worked as a Full Stack Developer on a Customer Support Ticket Management Platform. My responsibilities included developing React components, creating REST APIs using Node.js and Express.js, implementing JWT authentication, integrating frontend with backend, performing database operations in MongoDB, fixing production bugs.

EDUCATION

IGNOU

Jul 2022 - Oct 2025

BCA - 60

PROJECTS

Frenzy (Full-Stack Language Exchange Platform) [↗](#)

Built a full-stack real-time language exchange platform enabling learners to discover partners, send friend requests, chat instantly, and initiate embedded video calls using Stream Chat and Stream Video APIs. Designed and developed an Express.js + MongoDB backend with JWT-based authentication, secure cookie handling, protected routes, and relational friend-request workflows. Implemented persistent 1:1 chat channels with typing indicators, rich message lists, inline video call invitations, and auto-generated deterministic channel IDs per user pair. Integrated Stream Video SDK to support in-app video meetings with speaker layout, call controls, and automatically created private rooms.

VectorShiftBuilder (ReactJS, JavaScript, Drag-and-Drop, Workflow UI) [↗](#)

Developed an interactive node-based pipeline builder enabling users to visually design and manage custom data processing workflows through a drag-and-drop interface. Built reusable, scalable UI components with configurable node properties and real-time updates, enhancing workflow flexibility and improving overall user experience.

SKILLS

Languages:- JavaScript (ES6+), Python, Java, SQL

Frontend:- React.js, HTML5, CSS3, Bootstrap, Responsive Design

Backend:- Node.js, Express.js, RESTful APIs

Databases:- MongoDB, Mongoose ODM, MySQL, Query Optimization

Tools & Platforms:- Git, GitHub, Postman, Render, Vercel
